Directions: Touch the TouchPoints on the first numeral as you skip count by three. After writing the answer, say the problem and answer quietly.

Directions: No guessing! If you know the answer to each problem, write it down. If not, count by the divisor up to the dividend making a tally mark in the box as you say each number. Count the tally marks and write the answer. Say the problem and answer quietly.

Name _____

Directions: The letter "x" can stand for any number. When a numeral and an "x" are written next to each other, it means multiply. In the following equations "x" is unknown. You must divide to find the value of the "x".

If $6x = 30$
Then $x = \underline{5}$
(Think: $30 \div 6 = 5$)

Check:
 $\underline{6} \times \underline{5} = \underline{30}$

If $6x = 42$
Then $x = \underline{\quad}$
(Think: $42 \div 6$)

Check:
 $\underline{\quad} \times \underline{\quad} = \underline{\quad}$

If $6x = 18$
Then $x = \underline{\quad}$
(Think: $18 \div 6$)

Check:
 $\underline{\quad} \times \underline{\quad} = \underline{\quad}$

If $6x = 36$
Then $x = \underline{\quad}$

Check:
 $\underline{\quad} \times \underline{\quad} = \underline{\quad}$

If $6x = 48$
Then $x = \underline{\quad}$

Check:
 $\underline{\quad} \times \underline{\quad} = \underline{\quad}$

If $6x = 24$
Then $x = \underline{\quad}$

Check:
 $\underline{\quad} \times \underline{\quad} = \underline{\quad}$

If $6x = 30$
Then $x = \underline{\quad}$

Check:
 $\underline{\quad} \times \underline{\quad} = \underline{\quad}$

If $6x = 54$
Then $x = \underline{\quad}$

Check:
 $\underline{\quad} \times \underline{\quad} = \underline{\quad}$

If $6x = 12$
Then $x = \underline{\quad}$

Check:
 $\underline{\quad} \times \underline{\quad} = \underline{\quad}$

If $6x = 6$
Then $x = \underline{\quad}$

Check:
 $\underline{\quad} \times \underline{\quad} = \underline{\quad}$

If $6x = 0$
Then $x = \underline{\quad}$

Check:
 $\underline{\quad} \times \underline{\quad} = \underline{\quad}$

If $6x = 42$
Then $x = \underline{\quad}$

Check:
 $\underline{\quad} \times \underline{\quad} = \underline{\quad}$

Name _____

Directions: Rename the following fractions by dividing the numerator (the top number) and the denominator (the bottom number) by 9.

9 out of 18 sections of the first circle are shaded. Since the numerator (9) and the denominator (18) can both be divided by 9, rename this fraction by dividing them by 9.

$$\frac{9}{18} \quad \begin{array}{l} \text{numerator} \\ \text{denominator} \end{array}$$

$$\frac{9 \div 9}{18 \div 9} = \frac{1}{2}$$

$$\frac{9}{18} = \frac{1}{2} \quad \text{These two fractions are equal.}$$

$$\frac{9}{18} = \frac{1}{2}$$

$$\frac{9}{45} = \frac{\quad}{\quad}$$

$$\frac{9}{27} = \frac{\quad}{\quad}$$

$$\frac{9}{72} = \frac{\quad}{\quad}$$

$$\frac{9}{81} = \frac{\quad}{\quad}$$

$$\frac{9}{36} = \frac{\quad}{\quad}$$

$$\frac{9}{9} = \frac{\quad}{\quad} \text{ or } 1$$

$$\frac{9}{54} = \frac{\quad}{\quad}$$

$$\frac{9}{63} = \frac{\quad}{\quad}$$
