There are 521 students at the event.

At the long jump, 127 students entered the event and 98 students finished. How many students did not finish?

- A  $127 + 98 = \underline{\quad}$   
students
- B  $127 - 89 = \underline{\quad}$   
students
- C  $127 - 98 = \underline{\quad}$   
students

There were 68 more students who entered the high jump than the long jump. How many students entered the high jump?

- A  $127 + 68 = \underline{\quad}$   
students
- B  $127 - 68 = \underline{\quad}$   
students
- C  $98 + 68 = \underline{\quad}$   
students

There were 99 second grade students at the event. There were 21 more third graders than second graders. How many third graders were there?

- A  $99 - 21 = \underline{\quad}$   
third graders
- B  $99 + 21 = \underline{\quad}$   
third graders
- C  $99 - 68 = \underline{\quad}$   
third graders

All the second graders and third graders were in the sack race.  
How many students were in the sack race?

- A  $219 - 99 = \underline{\quad}$   
students
- B  $120 - 99 = \underline{\quad}$   
students
- C  $120 + 99 = \underline{\quad}$   
students

Name \_\_\_\_\_

A plane flew from Smallville to Bigville with a stop in Midville. In Midville, 179 passengers got off, and 186 passengers got on. When the plane arrived in Bigville, all of the 202 passengers got off. How many passengers got on the plane in Smallville?

	Got on	Got off
Smallville		
Midville		
Bigville		

\_\_\_\_\_ passengers    \_\_\_\_\_ passengers

To find out how many total passengers got off the plane in Midville and Bigville, I need to  A add  B subtract.

The number of passengers that got off the plane in Midville and Bigville is \_\_\_\_\_ passengers.

- A 388
- B 367
- C 381

To find out how many passengers got on the plane in Smallville, I need to  A add  B subtract.

The number of passengers that got on the plane in Smallville is \_\_\_\_\_ passengers.

- A  $> 179$
- B  $= 179$
- C  $< 179$

Is the number of people that got on and off the plane in Midville  $>$ ,  $<$ , or  $=$  the number of people that got on the plane in Smallville and off the plane in Bigville?

- A  $>$
- B  $<$
- C  $=$

Name \_\_\_\_\_

Chun and Huong were making chains with beads.

Chun used 146 red beads, 160 blue beads, and 174 green beads.

Huong used 116 red beads, 145 blue beads, and 174 green beads.

	Chun	Huong
red beads	146	116
blue beads	160	145
green beads	174	174
total beads		
pattern		
next number in the pattern		

About how many beads did they use altogether?

	Actual	Estimate
Chun		
Huong		

         beads               beads

The girls had a total of 45 beads left when they finished making the chains of red, blue, and green beads. How many beads did they have when they started?

- (A) 860 beads
- (B) 906 beads
- (C) 960 beads

Look at the table at the top. If the next number in the pattern is yellow beads, how many total beads were used by Chun?

- (A)  $906 - 470$
- (B)  $480 + 188$
- (C)  $668 - 14$

If Chun and Huong used the same number of beads to make each chain, who made more chains? (A) Chun (B) Huong
