

The NEA FOUNDATION

Chattahoochee Elementary is set to receive a multisensory math program for students with math disabilities thanks to a grant from the NEA Foundation.

Chattahoochee Elementary is set to receive a multi-sensory math program for students with math disabilities thanks to a grant from the NEA Foundation.

Diane Rice, a special education teacher at Chattahoochee in Duluth, and partner Alexandra Prosser have received a \$5,000 Student Achievement grant from the NEA Foundation. This grant will introduce TouchMath to their school.

“My colleagues and I have a strong belief that all children can learn ... but not in the same way,” Rice said in a press release. “We must find out how each of our students learn and then locate the tools that work. TouchMath is based on research and on what we know about how children learn.”

In the past year of this program, the NEA Foundation has awarded 113 grants that have reached 3,722 educators and 66,242 students in 33 states. More than 800 educators across the country applied for the grants.

“By directly funding educator-conceived and -led projects, the Foundation enables educators to chart their own course to solve teaching and learning challenges,” said Harriet Sanford, president and CEO of the NEA Foundation.
